About Me

Adaptable professional with all-around & hands-on experience across content creation, design, project coordination, and team collaboration.

Comfortable learning new tools and processes quickly, and genuinely interested in understanding how campaigns and customer relationships drive real business results.

Strong organisational skills, attention to detail, and a proven commitment to delivering quality work on schedule. Eager to bring an ownership mentality and problem-solving mindset to managing client campaigns.

Education

- **CS50x** May 2024 – March 2025, Online
Harvard University
Core computer science concepts including algorithms, data structures, and web development. Applied learning to real-world projects in Python, JavaScript, and web technologies.
- **Professional Foundation** May 2023 – Aug 2023, Accra, Ghana
ALX
Rigorous professional development program focused on problem-solving, communication, leadership, and collaborative project execution with real-world case studies.

Experience

- **Featured Project: Baking Intelligence Conversion Tool** 2025 – 2026
Baking Intelligence
 - Designed and built a full-stack React web application deployed on Vercel, demonstrating complete project ownership from conception through deployment.
 - Engineered 180+ ingredient database with categorized search, fractional cup display, oven temperature conversion (Celsius, Fahrenheit, Gas Mark), and custom ingredients with persistent local storage.
 - Delivered multiple polished features including color themes (Luxe, Warm, Blush, Dark Mode), eBook showcase with WhatsApp integration for customer conversion, and fully responsive mobile-first design.
 - Tech stack: React.js, JavaScript (ES6+), CSS, localStorage API, Node.js/npm, Git, GitHub, Vercel deployment.
- **Streamlit App Developer & Project Manager** Feb 2025 – Apr 2025
Data Science Project
 - Led a 3-member team through full project lifecycle, overseeing planning, documentation, and front-end development with attention to schedule and quality.
 - Coordinated integration of multiple technical components to produce polished deliverables that met stakeholder expectations.
 - Demonstrated project management and team coordination skills in a results-driven environment.
